PROFILE

Fullstack Developer with over 7 years of experience designing and scaling robust solutions for high-traffic ecosystems exceeding 20,000 active users. Specialist in the JavaScript/TypeScript ecosystem (React, NextJS, Node.js) with experience leading teams and a strong background in building efficient backend systems using Django and Python.

Experienced in creating optimized interfaces through reusable component architectures , complex state management with Redux , and database design across both relational (PostgreSQL, MySQL) and NoSQL (MongoDB, Firebase) systems. I possess an advanced English level and extensive experience collaborating in multidisciplinary teams under Clean Code standards and continuous delivery. Passionate about technical innovation and UX/UI optimization.

SKILLS

(Years of Experience)

Frontend: React (5), Redux – 3, Typescript (5), Javascript (7), CSS3 (7), Tailwind CSS (2)

Backend: NodeJS (5), Python/Django (1), NestJS (1), PHP (5)

Data Bases: MongoDB (3), PostgreSQL(1) , MySQL (1), Firebase (2)

Tools/Ops: GIT (7), Linux (7), SASS (2), ElectronJS (1), CI/CD (1), React Testing Libray (2), Jest (2), Mapbox (1)

EXPERIENCE

RAMSEY THEORY GROUP FULLSTACK DEVELOPER

MAY 2023 – AUGUST 2025

- Participated in the design and maintenance of a digital ecosystem for vehicle commercialization used by more than 20,000 active users, as well as in the implementation of a modular frontend architecture using React, TypeScript, Redux, and Tailwind CSS, improving component reusability and interface performance.
- Led the optimization process of state management and data flow in complex dashboards, increasing application responsiveness and overall fluidity.
- Contributed to backend development using Django and PostgreSQL, improving models, serializers, and API views.
- Increased API response efficiency by approximately 20% through backend optimization and clean code best practices.
- Participated in the deployment of the application's infrastructure using Docker and GitLab CI/CD, optimizing the related integration and delivery processes.
- Developed unit tests for frontend components and modules using React Testing Library and Jest, strengthening the application's stability and reliability.

BAIRES DEV FRONTEND DEVELOPER

OCTOBER 2022 – FEBRUARY 2023

- Developed reusable and scalable React components for a data analytics platform used by energy companies across the United States. Also using Typescript and SASS
- Refactored existing frontend code to improve maintainability, readability, and performance.
- Contributed to component standardization and visual consistency across multiple platform modules.
- Collaborated within distributed international teams following modern development methodologies.

EXPERIENCE

ITS SOLUTIONS

FULLSTACK DEVELOPER

JUNE 2021 – DECEMBER 2021

- Led fullstack development of a home services platform supporting approximately 10,000 users.
- Built mobile-first interfaces using Ionic/Angular and Typescript integrated with Firebase services.
- Implemented SSO authentication and real-time data management.
- Integrated geolocation services using Mapbox for service discovery and assignment.
- Developed a production-ready backend focused on stability and scalability.
- Managed the deployment and configuration of infrastructure on AWS using EC2 instances, ensuring platform stability and reliable production performance.

TD7: TECNOLOGIA DIGITAL 7

FULLSTACK DEVELOPER

MARCH 2020 – AUGUST 2020

- Contributed to the development of a cryptocurrency trading platform using ReactJS.
- Implemented user interfaces focused on performance, usability, and user experience.
- Supported backend services ensuring operational stability and transaction security.
- Collaborated in delivering a production-ready fintech ecosystem.

EXPERIENCE

Friends of hope INTL, INC.

FULLSTACK DEVELOPER (Part-Time)

SEPTEMBER 2018 – DECEMBER 2023

- Developed and maintained the organization's institutional website using PHP and HTML5.
- Managed deployments and infrastructure maintenance on GoDaddy hosting.
- Implemented UI improvements and SEO strategies that increased the organization's digital reach.
- Provided ongoing technical support and functional enhancements.

COMERXION,

FRONTEND DEVELOPER

FEBRUARY 2018 – JULY 2019

- Developed desktop application interfaces for a sales platform using ElectronJS.
- Implemented UI components focused on improving workflow efficiency and user experience.
- Participated in frontend architectural decisions for the application.
